Aeger Primo

March 7, 2015 Reformation Meeting

Last week, we held our workshop, offering up to 5 CE credits for the extremely reasonable price of \$15 at the door.

Dr. Bopp from Bone and Joint gave a presentation on degenerative hips, we learned a bit about Ebola Hemorrhagic Fever from Suesan Ziemann, and finally Grant Wilson offered 3 credits regarding AST and forming state assemblies. Door prizes were won and fun was had!

Save the Date!

Nat'l Conference

May 12-16

Held in San Antonio this year. Registration is online at www.ast.org

Fall Meeting

Sept. 26th

Come wrap up Surg Tech Week with us! Delegates for 2016 conference will be chosen. 4-5 CE credits, pending AST.

Keep Going, It's Worth It!

Being a surgical technologist is hard. Long hours, "particular" doctors, and equipment that works... sometimes.

But being a student is hard too. Some days after clinicals, people would ask me what I did that day and I honestly could not remember. I would have to sit and think, and would ultimately respond with, "I know I did SOMETHING today, but I honestly have no idea what."

But I can still say my proudest moment, as a surgical technologist is when a doctor who insulted me at the beginning of the case was complimenting me at the end.
